2. Create a **glossary** with your important words. You can use this traductor

<https://www.wordreference.com/>. Look at the exemple

- a. *Amazing*: espectacular
- b. *set up*: organitzar

***If you don't understand something, don't worry!  
On monday I will talk with you!***

# ***The Scientific Method Rap***

by tunes2teach

[https://www.youtube.com/watch?time\\_continue=42&v=bUa-ilQqEv0&feature=emb\\_title](https://www.youtube.com/watch?time_continue=42&v=bUa-ilQqEv0&feature=emb_title)

It's the scientific method (method,  
method...)

**Experiments** are amazing,

The unknown has no borders,  
use the scientific method,  
plan and follow the **steps in order**.

Chorus: It's the scientific method (method,  
method...)

You start with a **hypothesis**.

"Huh? What's that?" you say,  
It's just an educated guess,  
It goes this way.

Any **question** that is puzzling you,  
Can a plant grow without light?  
Can a monkey tie a shoe?  
Do dogs have a good eyesight?

Chorus: It's the scientific method (method,  
method...)

Now **set up** your experiment,

*Cool, can I make slime?*

Only if it's scientific,  
And if it's worth the time.

Everything in your experiment  
must be the same

Except for the **variable**

*Yeah, that's it's name!*

Chorus: It's the scientific method (method,  
method...)

To see if coins falls faster  
When dropped from different heights,  
Everything must be the same,  
Except the height, right?  
So height is your variable;  
It's the only thing you change.  
What do you drop, when you drop it,  
All that stays the same.

Chorus: It's the scientific method (method,  
method...)

Now time for your **conclusion**:  
Was your hypothesis right or wrong?  
That's the scientific method,  
Everybody sing along.

Chorus: It's the scientific method (method,  
method...)

BREAK IT DOWN
